

Daniel Soares

Full Stack Developer · Web, Mobile & AI

dlsouares18@gmail.com · linkedin.com/in/soares-daniel · github.com/dlsouares18

Profile

Full stack developer creating web and mobile products from concept to publication. Current toolkit: React Native/Expo, TypeScript, Flutter/Dart, PHP, MySQL, PostgreSQL and Firebase. Experience with RevenueCat subscriptions and self-managed VPS hosting. Uses Stitch, Codex and Claude Code to support design and development. Seeking international remote opportunities.

Experience

Independent product development

Concept, UX/UI, development and publication of web and mobile products, including SEMON, Recibo Fácil Fácil, TIA and Bichano.

Santa Casa da Misericórdia do Porto

Junior Developer · Six-month internship · 2024 — Worked on PHP payment methods, payment-reference generation and a React internal telephone directory.

TC Cards

Graphic Designer & Print Manager · 2015–2020 — Graphic design, customer service and print production management.

Selected work

SEMON

Approximately 50,000 student identity registrations supported in 2024–2025. Card issuance in 17 seconds with the registration completed beforehand.

Recibo Fácil Fácil

More than 3,000 downloads per month and active subscriptions, as reported by the developer. Downloads are not a measure of active users.

TIA para Professores

A published product designed around a real teaching workflow. Quantified usage and time-saving results are not yet available.

Carteirinha do Autista

More than 3,500 cards issued in one year within 2025–2026, mainly in Natal/RN and the surrounding region, with some issuance outside the state.

Technical toolkit

React Native · Expo · bare workflow · TypeScript · Flutter · Dart · PHP · MySQL · PostgreSQL · Firebase · Stitch · Codex · Claude Code · VPS · HestiaCP · RevenueCat
